

vegetables and cereals, fresh and processed

**CAROTA NOVELLA DI ISPICA PGI**

**PRODUCT**

The Carota Novella di Ispica PGI is obtained from varieties of semi-long group Carota Nantese and their hybrids of the species *Daucus carota* L.

**appearance:** The Carota Novella di Ispica PGI cylindrical-conical in shape, with a diameter ranging from 15 to 40 mm and a weight of between 50 and 150 grams. Aspect is introduced clean, shiny surface, devoid of rootlets and root apical secondary and no visible cracks;

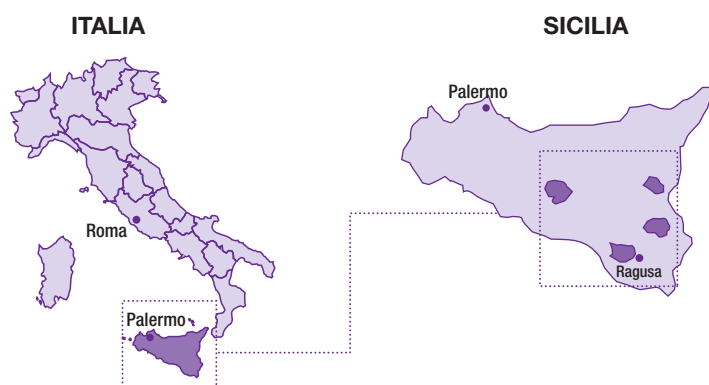

**color:** the color orange is particularly intense;

**taste:** the inner part is fibrous and the flesh is tender and crisp. The flavor is typical of the carrot, the aroma is intense with notes of grass.

**season:** sowing is done in the fall and is followed by a rolling process that sow the seeds 1 cm deep. Harvesting is done on a daily basis from 20 February to 15 June. Already reaching maturity in late February, the Carota Novella di Ispica IGP differs from the other carrots to be a typically winter-spring.

**PRODUCTION ZONE**

The production area of Carota Novella di Ispica PGI includes some municipalities in the provinces of Ragusa, Siracusa, Catania and Caltanissetta in Sicily

**DENOMINATION MARK**

The logo consists of a carrot and the words "Carota Novella di Ispica IGP" with coupon ID yellow and blue.
